

Project Design Phase
Problem – Solution Fit Template

Date	07 October 2026
Team ID	
Project Name	Centralized Medical Diagnosis Center (Diagnostic Test Center Portal)
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. For the Centralized Medical Diagnosis Center, the problem is that patients and labs depend on manual, disconnected booking, payment and report handling. The Diagnostic Test Center Portal solves this by bringing booking, slots, pricing, payments, notifications and reports into one secure ServiceNow portal.

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers: patients, lab technicians and admins.
- ☐ Succeed faster and increase adoption by using channels people already use: a web portal and email.
- ☐ Sharpen communication with the right triggers and messaging: confirmations, reminders and report alerts.
- ☐ Increase touch-points with the center by solving frequent annoyances: queues, overbooking and late reports.
- ☐ Understand the existing situation in order to improve it for the target group.

Template:

The completed canvas for the Centralized Medical Diagnosis Center is on the next page.

Problem – Solution Fit Canvas: Centralized Medical Diagnosis Center

1. CUSTOMER SEGMENT(S) [CS] - Patients and families who need lab tests: working adults, elderly patients and people who need home sample collection - Lab technicians who collect samples and upload reports - Diagnostic center admins and lab managers who run the center	6. CUSTOMER CONSTRAINTS [CC] - Limited time to visit labs and wait in queues - Budget limits: need clear prices before booking - Low digital comfort for some elderly users; need a simple guided interface - Privacy worries about sensitive reports and payments - Dependence on a phone or browser and an internet connection	5. AVAILABLE SOLUTIONS [AS] - Phone calls and walk-in booking: familiar, but long queues, no live slot view and no tracking - Printed reports collected in person: easy to lose, and collection costs a trip - Separate lab websites or messaging apps: scattered, no single record of appointments, payments and reports - Differentiation: one centralized portal with live slots, pricing, workflow, alerts and secure role-based access
2. JOBS-TO-BE-DONE / PROBLEMS [J&P] - Patients: find a test or package, pick a date and slot, choose lab visit or home collection, see the price, pay, get the report - Lab technicians: see assigned appointments, update sample status, upload reports - Admins: manage test catalog, pricing, slots, technicians and approvals	9. PROBLEM ROOT CAUSE [RC] - Booking and records are manual and disconnected, with no single system for appointments, payments and reports - No real-time slot validation, so slots get overbooked and schedules clash - No automatic reminders or status updates, so patients keep calling to ask - Weak role-based control over who can see or change reports and payments	7. BEHAVIOUR [BE] - Call or walk in to ask about tests and prices, then compare labs - Wait in queues for booking, sample collection and report pick-up - Call the lab to check whether the report is ready - Keep printed copies of reports and carry them to the doctor
3. TRIGGERS [TR] - Doctor prescribes tests or a health check-up package - An elderly or sick family member cannot travel, so home collection is needed - Frustration with queues and missed or delayed reports 4. EMOTIONS: BEFORE / AFTER [EM] - Before: anxious, confused about prices and slots, frustrated by waiting and uncertainty about the report - After: confident and in control, informed through email updates, trusting transparent billing and secure reports	10. YOUR SOLUTION [SL] - A Diagnostic Test Center Portal built on ServiceNow Service Portal - Browse tests and packages; pick date, time slot and home collection - Real-time slot validation prevents overbooking - Dynamic pricing with discounts and clear billing - Flow Designer workflow: validation, payment confirmation, optional approval, cancellation rules - Email alerts at booking, payment, reminders, sample collection, report ready and cancellation - Scheduled jobs move status from Scheduled to Completed and mark missed appointments - Role-based ACLs for Patients, Lab Technicians and Admins; admins manage catalog, pricing, slots and technicians	8.1 ONLINE [CH] - Service Portal for browsing, booking, payment, appointment tracking and report download - Email notifications at each key stage 8.2 OFFLINE [CH] - Home sample collection by a technician or a visit to the center - Phone enquiry to the center for help; booking details stay in the same system - Report available to download, so printing is optional
