

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	07 October 2026
Team ID	Service Now
Project Name	Diagnostic Test Center Portal
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Access and Roles	Login to the Service Portal Role-based access (ACLs) for Patients, Lab Technicians and Admins
FR-2	Test Catalog Browsing	Browse available diagnostic tests View test packages and pricing
FR-3	Appointment Booking	Select preferred date and time slot Choose home sample collection option Submit appointment request through a guided interface
FR-4	Slot Availability Validation	Real-time slot availability check Prevent overbooking of lab tests and home collection
FR-5	Booking Workflow (Flow Designer)	Automated validations Payment confirmation Optional administrative approval
FR-6	Dynamic Pricing and Billing	Price based on tests, packages and home collection Discount rules applied automatically Transparent billing
FR-7	Cancellation and Rescheduling	Update the appointment record Apply cancellation rules Send status notifications
FR-8	Email Notifications	Booking submission and payment confirmation Appointment reminders and sample collection updates Report availability and cancellation alerts
FR-9	Status Automation (Scheduled Jobs)	Update status: Scheduled, Sample Collected, Processing, Report Ready, Completed Mark missed appointments
FR-10	Report Management	Lab Technician uploads the report Patient views the report when it is ready
FR-11	Admin Management	Manage test catalog and pricing structures Configure slots and technician assignments Manage workflow settings via custom tables and forms

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Guided, user-friendly Service Portal so patients can browse, book and track appointments with minimal steps, on desktop and mobile.
NFR-2	Security	Role-based ACLs restrict create, view, update and report upload actions; patient reports and records stay confidential; authenticated access only.
NFR-3	Reliability	Bookings, payments and status changes are recorded accurately; validations prevent double booking and inconsistent appointment states.
NFR-4	Performance	Slot availability checks, price calculation and portal pages respond quickly during booking; notifications and background jobs run without delaying users.
NFR-5	Availability	Portal available for booking and report access whenever needed, with scheduled jobs running reliably in the background.
NFR-6	Scalability	Handles growing numbers of patients, tests, packages, slots and technicians through configurable custom tables and workflows.
